

WICHITA NATURAL GETS 2 GASSERS

A good gas well, the flow estimated at 2,000,000 cubic feet, was struck Tuesday night at the Murphy No. 9 location, Wichita Natural holding. The flow was struck at about 1,250 feet. It has not been decided whether or not to drill deeper for oil.

Roy Jack on the Adsit well in 36-25-4 will drill in a gas well this afternoon. They had just pierced the sand Tuesday evening and had a flow estimated at 130,000 cubic feet. The well is an offset to the Dillenbeck gasser in 35-25-4.
